

# Safety and Vulnerability Assessment Report

## Dear School Administrators,

Our students and staff's safety and security are paramount in the contemporary educational landscape. However, it is a sobering reality that many of our nation's schools were constructed at a time when these critical considerations were not at the forefront of design and planning. The result is a nationwide portfolio of educational facilities that may need more modern security standards, leaving them vulnerable to today's evolving threats.

Recognizing the urgent need to address these challenges, we have leveraged state-of-the-art technology to provide a comprehensive Safety and Vulnerability Assessment through our digital site assessment mobile app, SITE|SAFETYNET?. This digital report is not only a reflection of our commitment to employing the latest technology to safeguard our students but also a versatile tool that can be shared and utilized in various ways:

- **For Discussion:** Engage stakeholders in meaningful conversations about your facilities' current safety and security.
- **Tabletop Discussions:** Utilize the report in simulated exercises to explore and understand potential scenarios, fostering a culture of preparedness.
- **Safety Triage and Improvements:** Leverage the insights provided to prioritize and implement necessary enhancements to your school's safety infrastructure.

Your partnership in this vital endeavor is greatly appreciated.

Sincerely,

Protecting Our Students, Inc.
