

# Safety and Vulnerability Assessment Report

Dear School Administrators,

Our students and staff's safety and security are paramount in the contemporary educational landscape. However, it is a sobering reality that many of our nation's schools were constructed at a time when these critical considerations were not at the forefront of design and planning. The result is a nationwide portfolio of educational facilities that may need more modern security standards, leaving them vulnerable to today's evolving threats.

Recognizing the urgent need to address these challenges, we have leveraged state-of-the-art technology to provide a comprehensive Safety and Vulnerability Assessment through our digital site assessment mobile app, SITE|SAFETYNET<sup>SM</sup>. This digital report is not only a reflection of our commitment to employing the latest technology to safeguard our students but also a versatile tool that can be shared and utilized in various ways:

- **For Discussion:** Engage stakeholders in meaningful conversations about your facilities' current safety and security.
- **Tabletop Discussions:** Utilize the report in simulated exercises to explore and understand potential scenarios, fostering a culture of preparedness.
- **Safety Triage and Improvements:** Leverage the insights provided to prioritize and implement necessary enhancements to your school's safety infrastructure.

The report you are about to review includes a detailed analysis of your school's risk identification score, demography, areas for improvement, and specific recommendations. It is meticulously designed to evaluate K-12 schools nationwide, focusing on identifying strengths, deficiencies, and weaknesses relative to school shootings, gun safety, and active shooter prevention.

By embracing this digital format, we ensure a swift and efficient assessment and provide a dynamic platform that can be instrumental in formulating and executing a robust safety strategy. We can take decisive steps towards a safer and more secure educational environment.

Your partnership in this vital endeavor is greatly appreciated.

Sincerely,

Protecting Our Students, Inc.

## **THREE (3) LEVEL(S) -** **IMPROVEMENTS AREAS**

### **LEVEL A: POLICE PARTNERSHIP + SAFETY POLICIES**

This level assesses your existing partnerships, highlighting misaligned safety discrepancies and security metrics and establishing a solid foundation for continuous improvement + Conduct a detailed examination and analysis of existing systems and safety protocols and policies, ensuring their alignment with industry best practices and mandated regulatory standards.

### **LEVEL B: FACILITY EXTERIOR + NEIGHBORHOOD**

Carry out a comprehensive evaluation of the campus's exterior areas, encompassing entranceways, parking facilities, boundary fencing, and all outdoor spaces, to ensure optimal safety measures + Carry out a comprehensive evaluation of the campus's exterior areas, encompassing entranceways, parking facilities, boundary fencing, and all outdoor spaces, to ensure optimal safety measure!

### **LEVEL C: FACILITY INTERIOR**

The Comprehensive Interior Campus Evaluation is an extensive assessment process that meticulously inspects and analyzes all interior spaces within a school's infrastructure. This evaluation is the most exhaustive level of our safety audits, ensuring a thorough examination of every corner of the school's interior. By conducting a Comprehensive Interior Campus Evaluation, we aim to identify and address potential safety concerns, creating a safer learning environment for students and staff. This rigorous process is part of our commitment to preventing school shootings and enhancing safety.

## **RECOMMENDATIONS**

### Action Points

A score of 75 out of 100 possible points for a school's Collaborative Planning and gun safety readiness is above average, but there is still room for improvement. Below are action plans and recommendations that the school can consider in order to further strengthen its Collaborative Planning and gun safety readiness:

- Create a comprehensive safety plan that outlines expectations for staff, faculty, and administrators.
- Increase communication between administrators, staff, and faculty to ensure that all members of the school community are aware of the safety plan and their roles in carrying it out.
- Invest in modern security measures such as surveillance cameras, metal detectors, and secure entryways.
- Encourage active participation in safety drills and training for staff, faculty, and administrators.
- Establish a discipline policy that is consistently enforced in order to ensure a safe and orderly environment for students.
- Develop a system for anonymous reporting of suspicious activity or potential threats to school safety.

In summary, the

**SCORE**

# KEY FOCUS AREAS FOR K-12 SCHOOL SAFETY AND SECURITY: EXPANDING ACTIVE SHOOTER PREVENTION

# ENHANCING SCHOOL SAFETY: SCORING ACTIVE SHOOTER MEASURES

A total overall assessment score is calculated for each facility post-assessment. In addition, the SITE|SAFETYNET<sup>SM</sup> App scores each of the Three (3) Levels from 0 and 100 in the Top Priorities Chart, with 100 representing a school with ideal security. The scores are calculated using our analytic team's assessment test, a well-established decision support method. In general, a grade of 90-100 represents a facility that offers optimal security, a grade of 80-89 represents a facility that meets most security standards, a grade of 60-79 represents a facility that is lacking in significant areas of security, and a grade of < 60 represents a facility that is in serious need of critical security updates. The scoring methodology allows for effectively comparing all types of schools on the same scale to provide a school district with an overall picture of its portfolio's needs. Even though there are different types of schools and supporting facilities, all facilities are graded on a similar set of factors and performance ratings using each school demography.

In addition to a total overall score, facilities receive a subtotal score in each of the three (3) Levels. This enables comparisons between school facilities in these areas to determine consistency or priority throughout the district.
