

Security Vulnerability Assessment For : Mary High

Introduction Section

SiteSafetyNet Report Objectives

- Incident Prevention: Ensure the implementation of measures that prevent accidents, injuries, or hazardous incidents on-site.
- Compliance: Assess and ensure compliance with safety regulations, standards, and protocols established by local authorities and industry best practices.
- Risk Assessment: Identify potential hazards and risks present in the workplace and develop strategies to mitigate or eliminate them.
- Training and Education: Provide ongoing training and educational programs for employees to increase awareness and adherence to safety procedures.
- Safety Culture Promotion: Foster a culture of safety consciousness among all personnel, encouraging proactive participation and responsibility in maintaining a safe working environment.
- Continuous Improvement: Continuously evaluate safety protocols and procedures, seeking opportunities for improvement and implementing necessary changes.
- Emergency Preparedness: Develop and maintain emergency response plans and procedures to effectively handle unexpected incidents.
- Documentation and Reporting: Ensure accurate and comprehensive documentation of safety-related incidents, near misses, and corrective actions taken.
- Equipment and Facility Maintenance: Regularly inspect and maintain safety equipment, tools, and facilities to ensure they are in optimal working condition.
- Communication: Establish clear communication channels for reporting safety concerns, incidents, and suggestions for improvement among all levels of the workforce.

Data Sources for School Gun Safety Report

Gun Violence Archive: A comprehensive online archive that tracks gun-related violence incidents across the United States.

K-12 School Shooting Database: A specialized database focusing on incidents of shootings that have occurred in K-12 schools, offering detailed information and analysis.

National Institute of Justice (NIJ): Governmental organization providing research and resources on gun violence, including studies, reports, and initiatives related to school safety.

CDC's National Center for Injury Prevention and Control: The CDC gathers data and conducts research on injuries, including those related to firearms and school safety.

Everytown for Gun Safety: Advocacy group offering data, research reports, and policy analysis related to gun safety, including school-related incidents.

Bureau of Justice Statistics (BJS): Collects and analyzes data on crime, including firearm-related incidents, which can provide insights into school safety.

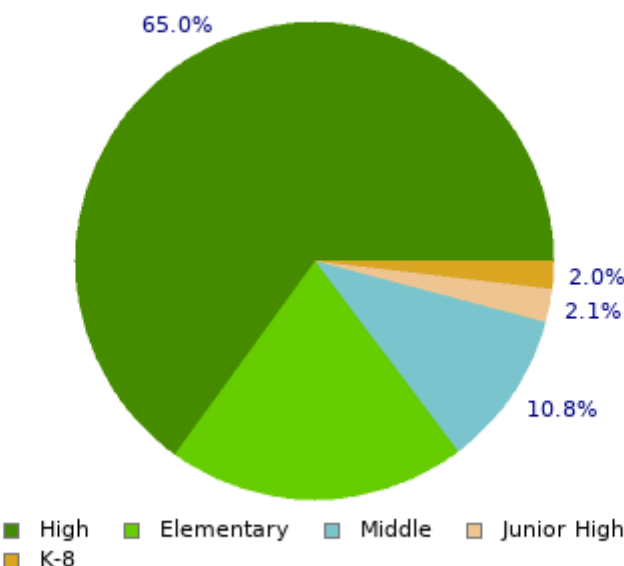

Sandy Hook Promise: Organization focused on preventing gun violence in schools, offering research reports, educational resources, and programs related to school safety.

Local Law Enforcement Agencies: Contacting local police departments or sheriff's offices can provide access to incident reports and data specific to the region or community.

Demographic Overview

Insights

K-12 School Shooting Database: School Level

The presented pie chart illustrates the breakdown of school shootings across different school levels, which is a critical demographic component of the overall safety assessment. The data underscores a disproportionately high number of incidents occurring at the high school level, which necessitates targeted interventions.

School Type Breakdown:

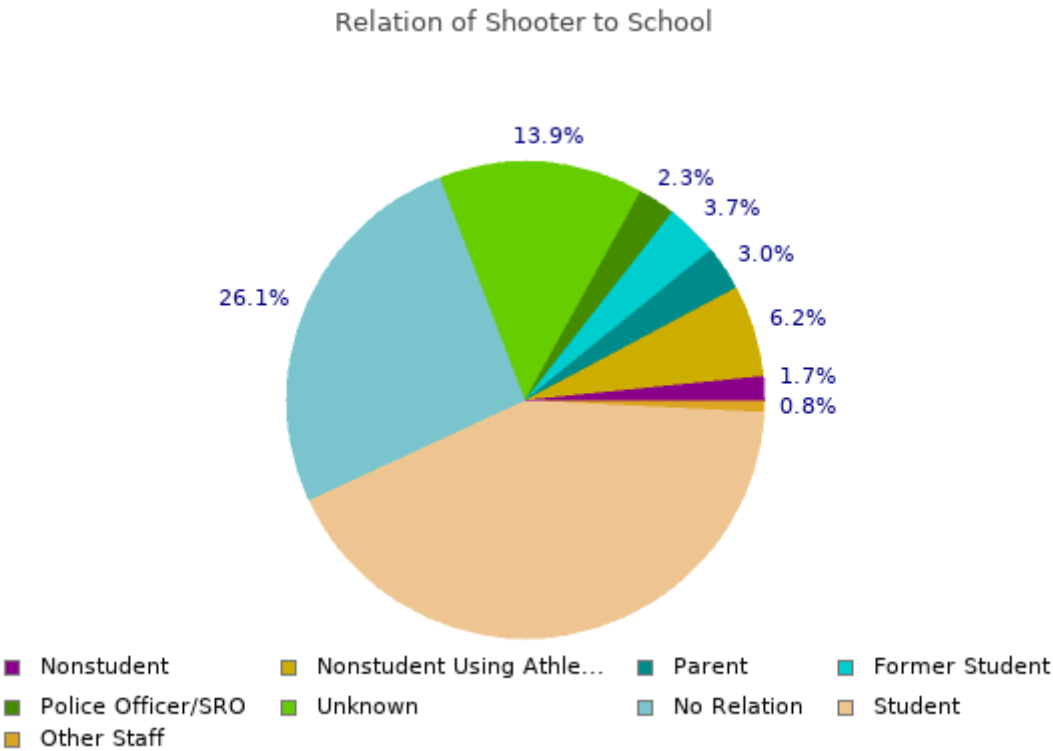

Elementary (19.4%) and Middle (10.4%) Schools: These education levels, while accounting for a significant portion of incidents, have distinct security requirements owing to the different developmental stages of their students. Safety strategies here should focus on preventive measures, including educational and awareness programs designed for young learners.

High Schools (62.7%): The high incidence of school shootings at this level calls for stringent safety measures. It is recommended that SITE|SAFETYNET? assessments be utilized to reinforce security. Additionally, the integration of advanced conflict resolution and mental health support services is advised, backed by research into the contributing factors specific to this demographic.

Junior High (2.0%) and K-8 (1.9%) Schools: While these levels exhibit lower incident rates, it is essential to proportionally allocate resources without neglecting safety measures. Vigilance and regular updates to safety protocols are imperative to ensure the wellbeing of these learning environments.

Insight:

The disparity in incident rates across school levels suggests the necessity of a hierarchical approach to safety. High schools, as the most impacted tier, should be the main focus for intensive safety measures and thorough audits. A dynamic, data-informed strategy is crucial, allowing for adaptive responses to evolving trends in school safety.

High schools, as the most impacted tier, should be the main focus for intensive safety measures and thorough audits. A dynamic, data-informed strategy is crucial, allowing for adaptive responses to evolving trends in school safety.

Time Period When Shooting Occurred

Time Period When Shooting Occurred:

The data indicates a need for heightened security during dismissal (431 incidents) and sports events (321 incidents), which are the timeframes with the highest occurrence of shootings. Continuous protective measures are also warranted during school hours, especially in the afternoon class period (280 incidents).

Recommendations:

Strategic deployment of security resources during peak times and consistent safety protocols throughout the school day can mitigate risks. Inclusive safety education for the school community is also crucial for preparedness and prevention.

Recommendations

Interior

Score: N/A

Action Plan:

- 22 out of 100% is not a good score for a school trying to improve its Interior and improve gun safety readiness. In order to improve and reach a higher score, the following action plans should be implemented:
- Establish a school safety committee to review and evaluate existing safety policies and procedures.
- Introduce and implement an Emergency Operations Plan to ensure that all staff and students are prepared in the case of a school emergency.
- Increase communication between school staff, students, and parents to identify potential gun safety risks.
- Develop an active shooter protocol to ensure that all staff and students know what to do in the case of an active shooter situation.
- Train all staff on gun safety, including proper storage and handling of firearms.
- Create a clear policy on the possession and use of firearms on school grounds.
- Improve school security measures, such as installing metal detectors and security cameras.
- In order to improve gun safety readiness and interior scores, the

Local law enforcement

Score: N/A

Action Plan:

- Based on the score of 43 out of 100, there are clearly areas for improvement in a school's Local Law Enforcement and gun safety readiness. In order to improve upon this score, the following action plans should be implemented:
- Increase the number of school resource officers and/or police officers available on school grounds.
- Develop a comprehensive emergency response plan in the event of a gun-related incident.
- Provide regular training and drills for staff and students on gun safety protocols.
- Create and implement a strict policy on gun safety and responsible gun ownership.
- Establish a positive relationship between students and local law enforcement personnel.
- By implementing these action plans, a school can improve its Local Law Enforcement and gun safety readiness, thus increasing its score. These plans will help to ensure that the school is better equipped to handle any gun-related incidents and to educate students and staff on the importance of gun safety.

Police Partnerships

Score: N/A

Action Plan:

- Based on the score of 33 out of 100% for Police Partnerships and Gun Safety Readiness, the school needs to take proactive steps to improve its score. The following action plans and recommendations may be used as a starting point for improvement:
- Develop a clear policy on gun safety which outlines expectations for all stakeholders in the school setting.
- Increase training for police officers and other school staff on gun safety protocols.
- Establish a school safety committee to review current safety protocols and make recommendations for improvement.
- Implement a comprehensive gun safety education program for students and staff.
- Establish a system of accountability for gun safety compliance.
- Increase the number of police officers on campus to ensure a safe environment.
- Promote regular communication between the school and police department to ensure ongoing safety initiatives.
- In summary, the school should take steps to improve its Police Partnerships and Gun Safety Readiness Score by implementing more rigorous safety policies and protocols, increasing training

School Security and cameras

Score: N/A

Action Plan:

- 83 out of 100 is a good score for a school trying to improve its security and gun safety readiness. To further improve these scores, the school should consider taking the following actions:
- Increase camera coverage of the school environment, including hallways, classrooms, and common areas.
- Implement an emergency alert system that notifies staff, students, and parents in the event of an emergency.
- Install metal detectors, if feasible, at all entrances to the school building.
- Train staff and students on proper gun safety protocols and develop a gun safety curriculum.
- Establish clear policies on gun possession and use on school grounds.
- Increase communication between school staff and local law enforcement.
- In summary, the school should implement measures to increase camera coverage, establish an alert system, install metal detectors, and train staff and students on gun safety protocols in order to improve its scores for school security and gun safety readiness.

Sports facilities

Score: N/A

Action Plan:

- 11 out of 100% is not a good score for a school trying to improve its Sports facilities and improve gun safety readiness. To improve the score, the school must take immediate steps to ensure both safety and improved sports facilities. Below are action plans for improving both safety and sports facilities:
- **Safety:**
- Develop a comprehensive safety plan to address risks associated with gun violence.
- Implement a school-wide security system that includes locking doors, installing cameras, and having a dedicated security team.
- Educate students and staff on gun safety, emergency procedures, and the consequences of firearms on school grounds.
- Provide mental health resources and counseling to students to prevent potential violence.
- **Sports Facilities:**
- Develop an infrastructure plan for sports facilities to accommodate larger groups of students and staff.
- Upgrade existing sports facilities with new equipment and technology to improve safety and performance.
- Provide adequate funding to maintain and improve sports facilities.
- Create a team of dedicated

Cooperation with other schools

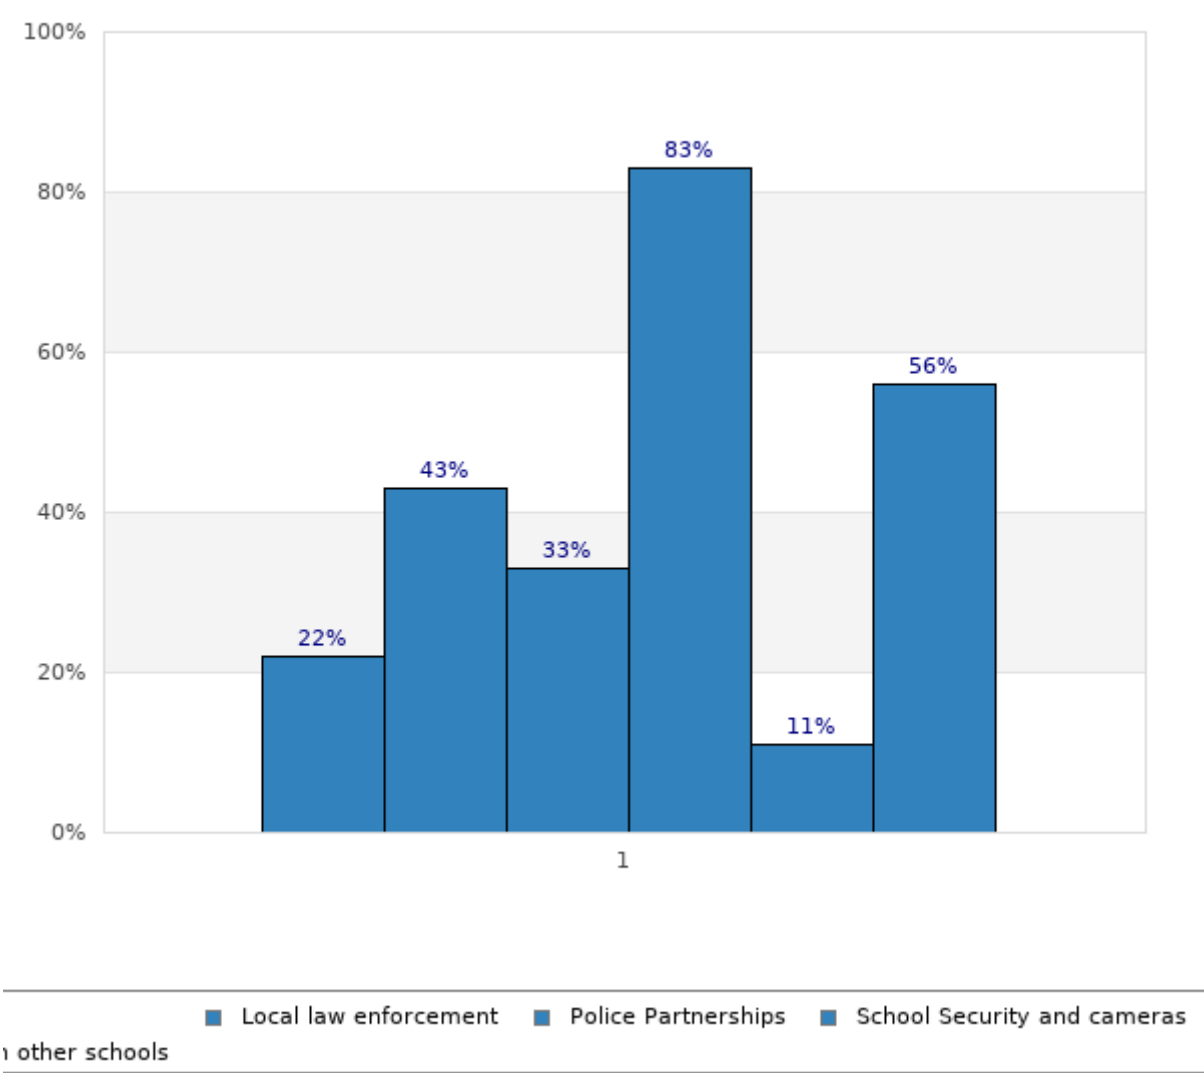

Score: N/A

Action Plan:

- A score of 56 out of 100% is below average for a school trying to improve its Cooperation with other schools and gun safety readiness. It is recommended that the school takes the following actions to improve its readiness:
- Form a task force to assess the school's current state of readiness and identify best practices for collaboration with other schools and gun safety.
- Develop an emergency plan that includes necessary resources, protocols, and training to effectively respond to potential gun safety threats.
- Implement a comprehensive communication system between administrators, teachers, parents, and other stakeholders to ensure that all are informed of any safety concerns or threats.
- Utilize technology to monitor and track guns on school grounds and in the surrounding area.
- Establish a gun safety curriculum to educate students on the responsible use of firearms.
- Increase funding for gun safety initiatives to ensure that the school is adequately prepared for any potential threats.
- In summary, the school should take proactive steps to improve its

KEY FOCUS AREAS FOR K-12 SCHOOL SAFETY AND SECURITY: EXPANDING ACTIVE SHOOTER PREVENTION

ENHANCING SCHOOL SAFETY: SCORING ACTIVE SHOOTER MEASURES

A total overall assessment score is calculated for each facility postassessment. In addition, the SITE|SAFETYNET? App scores each of the Three (3) Levels from 0 and 100 in the Top Priorities Chart, with 100 representing a school with ideal security. The scores are calculated using our analytic team's assessment test, a well-established decision support method. In general, a grade of 90-100 represents a facility that offers optimal security, a grade of 80-89 represents a facility that meets most security standards, a grade of 60-79 represents a facility that is lacking in significant areas of security, and a grade of 60 represents a facility that is in serious need of critical security updates. The scoring methodology allows for effectively comparing all types of schools on the same scale to provide a school district with an overall picture of its portfolio's needs. Even though there are different types of schools and supporting facilities, all facilities are graded on a similar set of factors and performance ratings using each school demography. In addition to a total overall score, facilities receive a subtotal score in each of the three (3) Levels. This enables comparisons between school facilities in these areas to determine consistency or priority throughout the district

ABOUT PROTECTING OUR STUDENTS Protecting Our Students, Inc. is a School Gun Safety Partner Coalition. Our mission is straightforward: To help reduce and end K- 12 school shootings. Getting there takes work, but we're dedicated to implementing our d i g i t a l SITE|SAFETYNET? mobile "Risk Assessment" app in every school nationwide. We build partnerships with educational institutions, public and private consultants, including Certified School Safety Professionals, School Security & Crises Preparedness Specialist, Law Enforcement, and Government Ag
